Half-Life 1 and Counter-Strike 1.6 BETA updated:

We have released an update to the beta for both games, fixes include:

- Fixed keyboard options dialog showing incorrect key names on non-QWERTY keyboards
- Fixed crash when typing in certain unicode characters
- Fixed voice chat sometimes not transmitting properly
- Allowed the toggleconsole command to be properly rebound

. Official servers issues:

There are some issues with the official servers, sometimes they stop responding, sometimes they just stop running. I'm very sorry about these issues and I will cancel my holiday and continue re-writing all of the Dedicated Server code. In the meantime, I will try to keep an eye on the servers and keep restarting them when necessary.. **Early Access Build 3 is out!**
Hey Everyone. Your feedback sofar has been very valuable.

I pushed build 3 out tonight which fixes bugs related to extrude, undo, per-axis locking, selection modes, documents being incorrectly hidden in the file browser, and more!

I also made the context-sensitive menus accessible now via pressing either the left touchpad (as before) or the menu button just above it on the left controller (or right in left-handed mode).

I'm putting together a big video tutorial series on how to create an entire VR scene in Verto Studio in VR mode. It's coming along and I'll be happy to post that once it is near completion!

Thanks everyone!. **UPDATE Ver 0.3.20180306:**

GENERAL UPDATES & IMPROVEMENTS. Trading cards, badges, emoticons, etc are in!
Sorry it took so long.

I've added all the steam goodies to Deadly Sin 2.

Enjoy and I <3 you all

. Give Us Your Suggestions Here!:

Hello everyone!

We are extremely excited to publish this game and we are really working hard to make sure you like it!

Keep in mind however that this is an Early Access game, which means A LOT is going to improve, be polished and even be replaced/removed, and the reason for that will be YOU.

We want YOU, the community, the gamer, to tell us what to do, tell us how to improve this game to meet your expectations.

Maybe some of you may want to suggest others to wait until the game is complete to get this game but that would not be helpful for us during the development stage, after all, the purpose of an Early Access game is for the developer to work along with the community for a greater good, which is turning the game into a truly awesome and worth experience.

That's why we opened this thread, so you can share with us every suggestion you got, the game hasn't been released yet but you can still tell us what you are hoping to see!

Thanks for reading and we hope you get to enjoy playing this game as much as we're enjoying working on it :D
